

Experience the excitement of working globally in Japan and overseas

Bosch Japan opens applications for “Global Internship,” an overseas internship program

May 30, 2017
C/CCR-JP-2017-09

- ▶ Developing engineers to lead development on the global stage
- ▶ Internships in bustling Ho Chi Minh City, Vietnam
- ▶ Popular programs from past years to be held again this year

Tokyo – Bosch Corporation (Shibuya, Tokyo), a member of the Bosch Group, a leading global supplier of technology and services, will operate an overseas internship program "Global Internship @Bosch", providing an internship opportunity at Bosch's subsidiaries in Japan and overseas to university students in Japan. The program is being held again this year after receiving a positive evaluation last year. The internship is for students of Japanese universities majoring in sciences at graduate and post-graduate level, and takes place over the summer break. Students can apply at [Bosch Japan website](#).

An authentic experience of the excitement and challenges of working experience in a global environment

Students who participate in the internship will experience some of the duties of an engineer through real work at Bosch. By working on projects, the participants will experience the excitement and challenges of working in a global environment. In addition, their stay in Vietnam will include programs such as an observation tour of the Ho Chi Minh Plant and exchanges with Japanese people working on overseas assignments. By catching a glimpse of Bosch's manufacturing in action and interacting with globally active engineers and local associates, some of last year's participants were able to improve their understanding of manufacturing, while others found that areas where they need to enhance in order to work on the global stage.

Developing engineers to lead development on a global stage

Today, the environment surrounding the manufacturing industry is changing. In Japan, engineers who can lead the evolution of development globally are

expected to play an even more important role in the future. Bosch Corporation is engaged in research and development with around 45,700 engineers working at a total of 94 locations in countries around the world. Commenting on the internship program, President and Representative Director of Bosch Corporation, Dr. Udo Wolz said "We are delighted to hold the program again this year after its excellent evaluation last year. We hope that the young people who will carry on the future of Japanese manufacturing will use this precious opportunity to get a feel for what it takes to be an engineer leading development globally."

The Bosch Group is a leading global supplier of technology and services. It employs roughly 390,000 associates worldwide (as of December 31, 2016). The company generated sales of 73.1 billion euros in 2016. Its operations are divided into four business sectors: Mobility Solutions, Industrial Technology, Consumer Goods, and Energy and Building Technology. As a leading IoT company, Bosch offers innovative solutions for smart homes, smart cities, connected mobility, and connected manufacturing. It uses its expertise in sensor technology, software, and services, as well as its own IoT cloud, to offer its customers connected, cross-domain solutions from a single source. The Bosch Group's strategic objective is to deliver innovations for a connected life. Bosch improves quality of life worldwide with products and services that are innovative and spark enthusiasm. In short, Bosch creates technology that is "Invented for life." The Bosch Group comprises Robert Bosch GmbH and its roughly 440 subsidiaries and regional companies in some 60 countries. Including sales and service

partners, Bosch's global manufacturing and sales network covers nearly every country in the world. The basis for the company's future growth is its innovative strength. At 120 locations across the globe, Bosch employs some 59,000 associates in research and development.

The company was set up in Stuttgart in 1886 by Robert Bosch (1861-1942) as "Workshop for Precision Mechanics and Electrical Engineering." The special ownership structure of Robert Bosch GmbH guarantees the entrepreneurial freedom of the Bosch Group, making it possible for the company to plan over the long term and to undertake significant up-front investments in the safeguarding of its future. Ninety-two percent of the share capital of Robert Bosch GmbH is held by Robert Bosch Stiftung GmbH, a charitable foundation. The majority of voting rights are held by Robert Bosch Industrietreuhand KG, an industrial trust. The entrepreneurial ownership functions are carried out by the trust. The remaining shares are held by the Bosch family and by Robert Bosch GmbH.
